Portfolio: hirushamadhushan.vercel.app

PROFESSIONAL SUMMARY

Motivated IT student with strong computer literacy and a passion for software development, experienced in full-stack web technologies, problem-solving, and building real-world applications. Experienced in taking a MERN-stack system from requirements through to a live production deployment. Skilled in the MERN stack, Java, machine learning fundamentals, communication, teamwork, and learning new technologies quickly. Organized, adaptable, and capable of handling both technical and team-based tasks efficiently while contributing to collaborative projects.

EDUCATION

Sri Lanka Institute of Advanced Technological Education (SLIATE), Anuradhapura (2024 – Present)
Higher National Diploma in Information Technology (HNDIT)

- Coursework: Web Development, Object-Oriented Programming (Java), Database Management Systems, Data Structures & Algorithms, Software Engineering, Software Quality Assurance, Computer Networks, Operating Systems & Security, Project Management, UI/UX Fundamentals, System Analysis & Design

TECHNICAL SKILLS

- Programming Languages:** Java | JavaScript | PHP | HTML5 | CSS3 | SQL
- Frameworks & Technologies:** React.js | Node.js | Express.js | Java Swing | Flask
- Databases:** MySQL | MongoDB | Supabase
- Tools & Platforms:** Git | GitHub | Postman | Docker | Google Colab
- Core Skills:** REST API | JWT Authentication | Socket.IO | Tailwind CSS | Responsive Design

PROJECTS

MediSync – Smart OPD Queue & Clinic Management System

Bilingual (Sinhala/English) full-stack platform for government OPD clinics, providing session-based appointment booking, real-time token queues shown on patient, doctor and public waiting-room display screens, role-based dashboards for four user types, cross-clinic medical records with generated PDF reports, and automated email notifications. Designed, built and deployed to production as an individual project, currently running live.

Tech: MongoDB, Express.js, React.js, Node.js (MERN), Socket.IO, Tailwind CSS, JWT, Nodemailer, Cloudinary, Vercel, Railway

Live Demo: <https://medisyncclk.dev>

Heart Disease Prediction – Machine Learning Web App

Flask web application that predicts heart disease risk from 13 clinical measurements, trained on the UCI Cleveland dataset. Compared five classification algorithms — Logistic Regression, Decision Tree, Random Forest, K-Nearest Neighbors and Naive Bayes — and selected Random Forest after Grid Search hyperparameter tuning, achieving 80.3% accuracy and 0.881 ROC-AUC, confirmed by 5-fold cross-validation. Covers the full pipeline: data cleaning, exploratory analysis, feature scaling, model evaluation (precision / recall / F1 / ROC) and a Flask front end with server-side input validation.

Tech: Python, scikit-learn, Pandas, NumPy, Flask, Google Colab

Madhushan Tech Store – E-Commerce Platform with Admin Panel

Computer-hardware storefront built on a hand-written PHP MVC framework with no external dependencies — front controller, router, models, controllers and views written from scratch. Covers a filterable catalogue, live AJAX search, cart and wishlist for guests and signed-in customers, promo codes and checkout, plus an admin panel for products, categories, brands, orders, customers and reports with CSV export. Security built in throughout: CSRF tokens on every state-changing request, prepared statements, content-validated image uploads and hardened session cookies. Containerised with Docker and deployed to production on Railway with managed MySQL and HTTPS.

Tech: PHP 8, MySQL, JavaScript, HTML, CSS, Apache, Docker, Railway, Git

Live Demo: madhushan-tech-store-production.up.railway.app

CERTIFICATIONS

- Getting Started with Full Stack Java Development – Simplilearn SkillUp (2026) – *Certificate code: 9918526*
- Web Design for Beginners – University of Moratuwa, CODL (2026) – [Verify](#) (Code: 6hQQIII7Nv)
- Full-Stack Development 101 – Simplilearn SkillUp (2025) – *Certificate code: 9593948*
- Python for Beginners – University of Moratuwa, CODL (2025) – [Verify](#) (Code: 6TWAE2S7Xj)
- Microsoft Learn Student Ambassador Event – Microsoft Learn (2025)

SOFT SKILLS

Problem-Solving | Team Collaboration | Self-Learning | Time Management | Adaptability | Communication

LANGUAGES

Sinhala – Native Proficiency | English – Professional Working Proficiency
