Portfolio: hirushamadhushan.vercel.app

PROFESSIONAL SUMMARY

Motivated HNDIT student passionate about software engineering and web application development. Skilled in PHP, JavaScript, SQL, OOP concepts and full-stack development with experience building real-world applications using both MERN Stack and PHP. Quick learner with strong problem-solving, teamwork and communication skills, eager to contribute as a Software Engineering Intern.

EDUCATION

Sri Lanka Institute of Advanced Technological Education (SLIATE), Anuradhapura (2024 – Present)
Higher National Diploma in Information Technology (HNDIT)

- Coursework: Web Development, Object-Oriented Programming (Java), Database Management Systems, Data Structures & Algorithms, Software Engineering, Software Quality Assurance, Computer Networks, Operating Systems & Security, Project Management, UI/UX Fundamentals, System Analysis & Design

TECHNICAL SKILLS

- **Programming Languages:** PHP | JavaScript | Java | SQL | C# | HTML5 | CSS3
- **Frameworks & Technologies:** React.js | Node.js | Express.js | Java Swing | Laravel
- **Databases:** MySQL | PostgreSQL | MongoDB | Supabase
- **Tools & Platforms:** Git | GitHub | Postman | Docker | Google Colab
- **Core Skills:** REST API | OOP | MVC | Responsive Design | JWT Authentication

PROJECTS

MediSync – Smart OPD Queue & Clinic Management System

Bilingual (Sinhala/English) MERN platform for government OPD clinics, deployed live to production.

- Session-based booking with real-time Socket.IO token queues on public display screens
- Role-based dashboards for four user types, secured with JWT authentication
- Cross-clinic medical records, PDF report generation and email notifications

Tech: MongoDB, Express.js, React.js, Node.js (MERN), Socket.IO, Tailwind CSS, JWT, Vercel, Railway

Live Demo: <https://medisyncclk.dev>

Heart Disease Prediction – Machine Learning Web App

Flask web app predicting heart disease risk from 13 clinical measurements (UCI Cleveland dataset).

- Compared five algorithms and selected Random Forest after Grid Search tuning
- Achieved 80.3% accuracy and 0.881 ROC-AUC, confirmed by 5-fold cross-validation
- Full pipeline: data cleaning, feature scaling, evaluation and a validated Flask UI

Tech: Python, scikit-learn, Pandas, NumPy, Flask, Google Colab

Madhushan Tech Store – E-Commerce Platform with Admin Panel

Computer-hardware storefront on a hand-written PHP MVC framework built from scratch.

- Filterable catalogue with live AJAX search, cart, wishlist, promo codes and checkout
- Admin panel for products, orders, customers and reports with CSV export
- CSRF tokens, prepared statements and validated uploads; Dockerised on Railway

Tech: PHP 8, MySQL, JavaScript, HTML, CSS, Apache, Docker, Railway, Git

Live Demo: madhushan-tech-store-production.up.railway.app

Batik Clothes – Custom Batik Apparel E-Commerce Platform

Laravel 12 e-commerce platform for a Sri Lankan hand-crafted batik clothing business.

- Catalogue with filters and reviews, per-size cart and transaction-safe checkout
- Custom design requests and saved body measurements for made-to-measure tailoring
- Admin portal with Chart.js sales reports, role middleware and PHPUnit tests in CI

Tech: Laravel 12, PHP 8.2, MySQL, Blade, Bootstrap 5, Chart.js, Docker, Railway, Git

GitHub: github.com/hirushamadhushan/Batik-Clothes

CERTIFICATIONS

- Getting Started with Full Stack Java Development – Simplilearn SkillUp (2026) – *Certificate code: 9918526*
- Web Design for Beginners – University of Moratuwa, CODL (2026) – [Verify](#) (Code: 6hQQII17Nv)
- Full-Stack Development 101 – Simplilearn SkillUp (2025) – *Certificate code: 9593948*
- Python for Beginners – University of Moratuwa, CODL (2025) – [Verify](#) (Code: 6TWAE2S7Xj)
- Microsoft Learn Student Ambassador Event – Microsoft Learn (2025)

SOFT SKILLS

Problem-Solving | Team Collaboration | Self-Learning | Time Management | Adaptability | Communication

LANGUAGES

Sinhala – Native Proficiency | English – Professional Working Proficiency
